PROJECTS

DIGITAL RESTAURANT App [Githubl [live]]

Aug 2023 - Oct 2023

- The Digital Restaurant app is a website where restaurant customers can easily order food, add it into the cart and see what food is available.
- Easy Sorting: You can quickly find what you're looking for by selecting a category like breakfast, lunch, dinner, or sweets
- Filtering: With a click, you can filter the menu to only show items from the category you want, making it easier to choose what you want to eat.

Tech Stack : React, Bootstrap, JavaScript, CSS, HTML

To-Do Application [Githubl [live]]

Jan 2024 - Feb 2024

- This is a To-Do application built using ReactJS. It allows users to add, view, edit, and delete tasks. The application showcases the use of HTML, CSS, JavaScript, React components, hooks, and state management using Redux.
- State management is handled using Redux. The application state includes a list of tasks and supports actions to add, edit, delete, and toggle the completion status of tasks.
- Features : add task, view task, edit task, delete task, mark as read task, Persistent storage

Tech Stack : ReactJS, Redux, HTML5, CSS3, Bootstrap
